

Tilting Grid Table

Equipment solutions

The Edgetech Tilting Grid Table is designed to meet your specific glass shop needs including:

- Large 48" x 84" surface to handle a wide range of glass sizes
- Air flotation for easy glass movement
- Reverse suction ensures positive glass holding during matching
- Retractable stops for easy glass matching
- Replaceable Arboron top surface for extended wear
- Grid surface (3/4") for muntin installation
- Aluminum extrusion air chamber to provide level surface and high strength
- PLC for reliable control
- Foot Pedal controls for easy hands free operation
- High quality regenerative blower for efficient air flow and greater vacuum
- Adjustable leveling feet to match existing equipment height
- Controls that allow fast and reliable tilting for muntin alignment inspection

Tilting Grid Table

Equipment solutions

Tilting Grid Table Features

- Replaceable Arboron top surface
- Movable stops
- Regenerative blower
- PLC Control

Service Requirements

- Electrical: 208-240/480 VAC
- Air: 100 PSI
